Add enzymes & fish oils (sardines/salmon) to above

INGREDIENTS TO AVOID:

* By-products of any type * Ethoxyquin * BHA/BHT * Grain pieces/food fragments (*brewer's rice, corn gluten, ect.*) * Corn as a 1st ingredient * Sweeteners (*corn syrup, sucrose, ammoniated glycyrrhizin*)
* Artificial colors * Propylene glycol (*toxic when consumed in large amounts, this is added to some "chewy" foods to keep them moist*) * Fats or proteins named generically. For example: "animal fat", "poultry fat", or "meat meal" (*as opposed to the better quality "beef fat", "chicken fat", or "lamb meal".*)
